Vortox Air Technology's Oil Bath Air Cleaners Excel As Precleaners

Vortox Air Technology, Inc. 121 South Indian Hill Boulevard Claremont, CA 91711 USA

Press release date: October 14, 2015

Claremont, CA—<u>Vortox Air Technology, Inc.</u>, an American manufacturer of innovative solutions to many industries' air filtration needs, reminds consumers that its oil bath air cleaners make excellent precleaners when used in conjunction with another air cleaner.

With an oil bath air cleaner as a first line of defense, followed by a second air cleaner—usually a dry air cleaner—engines are better protected from dirt and contaminants that can cause breakage, downtime, and other problems. Using the oil bath as a precleaner also extends the life of the primary air cleaner because so much of the dirt is caught before reaching it.

This method, which doesn't void existing warranties, results in less downtime for maintenance since the paper filters don't have to be changed as often and fewer paper filters need to be purchased.

Oil bath air cleaners function so well as precleaners because they are highly efficient and are able to process large amounts of dirt much better than dry air cleaners. And since the only necessary servicing is a generic oil change, they require much less maintenance.

Sizes from 75–1500 CFM are available. All Vortox oil bath air cleaners attain 90% efficiency at only 20% CFM capacity, and they come in a variety of styles for all applications.

Oil bath air cleaners feature self-washing filter elements, large dust-holding capacity, vertical mounting capability, carbon steel construction, and a large variety of sizes. Dry air cleaners protect engines using advanced filter paper technology to provide up to 99.99% efficiency and are available in single-stage or multistage configurations for the harshest environments.

For more information on Vortox's complete line of oil bath and dry air cleaners, along with the rest of the Vortox product line, please visit Vortox Air Technology at www.vortox.com or call (909) 621-3843.

About Vortox Air Technology, Inc.

Beginning in the 1950s, Vortox Company participated with others in the industry to establish the basic specifications of all air filtration devices used globally in automotive, industrial, agricultural, and military applications. Vortox designed and developed the integrated cap and

screen-polished stainless steel air cleaner seen today on cowl-mounted class 8 trucks and has continued to serve the oil, automotive, trucking, alternative-fuel, electromotive, agriculture, industrial, and defense industries, providing a complete line of oil bath and dry type air cleaners, separators, and accessories to original equipment manufacturers and additional distributors. In January 2010, Vortox Air Technology, Inc. acquired the sales and manufacturing assets of Vortox Company.
