

# CLR Inlet Caps

The CLR series are identical to the CL style with the addition of a 180° rain shield. The rain shield, located at the front of the Inlet Cap, provides added protection from moisture, making it the most efficient Inlet Cap. Select CLR models are available in Stainless Steel and are identified by the prefix “SSB.”

### Vortex Air Technology Inlet Caps

Inlet Caps are an essential component in the protection of filter elements used in both dry and oil bath air cleaners. They function as a pre-filtering mechanism for the air cleaner, preventing large particles of debris from potentially harming the air cleaner and filter element in addition to shielding water ingress.
