

Numbered Inlet Caps

The Inlet Caps belonging to the Numbered Series contain variations of unique customized designs. Often used to compensate for an offset inlet tube, these Inlet Caps come in a variety of formations, and with options such as no rain shield or a full 360° rain shield.

Vortex Air Technology Inlet Caps

Inlet Caps are an essential component in the protection of filter elements used in both dry and oil bath air cleaners. They function as a pre-filtering mechanism for the air cleaner, preventing large particles of debris from potentially harming the air cleaner and filter element in addition to shielding water ingress.
