

T650 Truck Blower

Vortex Air Technology, Inc. is pleased to offer the AWA11X17A4 model Truck Blower Air Cleaner. Engineered and designed specifically for use on the Tuthill T650 Blower, the AWA11X17A4 measures 11"x17"x7" in height, with an oval inlet tube which accepts a 4" rubber hose. Its flat box shape creates a flanged outlet which bolts directly to the blower inlet and eliminates the need for mounting accessories. The T650 Blower Air Cleaner is constructed entirely of 16 and 18 gauge Carbon Steel and is finished with black powder coat paint. The T650 Truck Blower Air Cleaner allows for easy servicing and filter access by releasing the six clamps which secure the flat panel filter element inside the air cleaner. The AWA11X17A4 uses Vortex Air Technology filter element VFP11X17.
