USA

Press release date: August 5, 2014

Claremont, CA — [Vortex Air Technology, Inc.](http://www.vortex.com), an American manufacturer offering innovative solutions to air filtration needs for a variety of industries, proudly announces the release of a much-requested custom version of its popular line of truck air cleaners. The new Low-Profile Truck Air Cleaner puts a stylish accent on the rugged, reliable cleaner of choice for truckers around the world.

With the Low-Profile Truck Air Cleaner's shortened screen and stud, truckers no longer need to cut the screens and studs themselves—thus voiding the warranty—in order to customize their rigs. The cleaner performs just as perfectly as the original Vortex Truck Air Cleaner and is available in 13-inch (27.75 inches tall) and 15-inch (31.88 inches tall) models.

All Low-Profile Truck Air Cleaners are compatible with Kenworth W-900 and Peterbilt 359, 379, and 389 trucks. Just like the full-size air cleaners, they use Vortex filter elements to keep truck engines running cleaner for longer with their durable all-T304 stainless steel construction, large dirt-holding capacity, and Vortex-pioneered integrated inlet cap design. Easy to service and striking to see, Vortex Truck Air Cleaners define classic looks and quality.

For more information on Vortex's complete line of Truck Air Cleaners, along with the rest of its product line, please visit Vortex Air Technology at www.vortex.com or call (909) 621-3843.

About Vortex Air Technology, Inc.

Beginning in the 1950s, Vortex Company participated with others in the industry to establish the basic specifications of all air filtration devices used globally in automotive, industrial, agricultural, and military applications. Vortex designed and developed the integrated cap and screen-polished stainless steel air cleaner seen today on cowl-mounted class 8 trucks and has continued to serve the oil, automotive, trucking, alternative-fuel, electromotive, agriculture, industrial, and defense industries, providing a complete line of oil bath and dry type air cleaners, separators, and accessories to original equipment manufacturers and additional distributors. In January 2010, Vortex Air Technology, Inc. acquired the sales and manufacturing assets of Vortex Company.
